## Mental Health on Campus Improvement Act (Introduced in Senate)

S 3311 IS

110th CONGRESS

2d Session

### S. 3311

To amend the Public Health Service Act to improve mental and behavioral health services on college campuses.

#### IN THE SENATE OF THE UNITED STATES

July 23, 2008

Mr. DURBIN introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

#### A BILL

To amend the Public Health Service Act to improve mental and behavioral health services on college campuses.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the `Mental Health on Campus Improvement Act'.

#### SEC. 2. FINDINGS.

Congress makes the following findings:

(1) The 2007 National Survey of Counseling Center Directors found that the average ratio of counselors to students on campus is nearly 1 to 2,000 and is often far higher on large campuses. The International Association of Counseling Services accreditation standards recommend 1 counselor per 1,000 to 1,500 students.

(2) College counselors report that 8.5 percent of enrolled students sought counseling in the past year, totaling an estimated 1,600,000 students.

(3) Over 90 percent of counseling directors believe there is an increase in the number of students coming to campus with severe psychological problems. The majority of counseling directors report concern that the demand for services is growing without an increase in resources.

(4) A 2006 American College Health Association survey revealed that 44 percent of students at colleges and universities report having felt so depressed it was difficult to function, and one out of every 11 students seriously considered suicide within the past year.

(5) Research conducted from 1989 to 2002 found that students seen for anxiety disorders doubled, for depression tripled, and for serious suicidal intention tripled.

(6) Many students who need help never receive it. Counseling directors report that of the students who committed suicide on their campuses, only 22 percent were current or former counseling center clients. Directors did not know the previous psychiatric history of 60 percent of these students.

(7) A survey conducted by the University of Idaho Student Counseling Center (2000) found that 77 percent of students who responded reported that they were more likely to stay in school because of counseling and that their school performance would have declined without counseling.

(8) A 6-year longitudinal study of college students found that personal and emotional adjustment was an important factor in retention and predicted attrition as well as or better than academic adjustment (Gerdes & Mallinckrodt, 1994).
